Excerpts of A Message from County Executive Marc Elrich March 4, 2021

Friday, March 5, marked one year since the first cases of Covid-19 were identified in Montgomery County. Since then, we have lost almost 1,400 County residents to this virus; we deeply mourn those losses. I also want to acknowledge the deep pain that so many of us have felt in this past year. We will not forget our loved ones and the loss.

None of us could have imagined the events of this past year—it has been extraordinarily difficult and we are all ready to move past it. The light at the end of the tunnel is visible. We have now offered vaccine appointments to everyone 75 or older who has [preregistered](#) on our website. More than 70 percent of our 75 and older population has received at least one dose. We will continue to vaccinate this group while we move to vaccinate other eligible people.

We have now begun offering appointments to people who are 65-74. More than 35 percent of residents in this category have already been vaccinated.

Additionally, many of our teachers—both at Montgomery County Public Schools (MCPS) and private schools—have already been vaccinated. We have been working with our hospital partners and very much appreciate their cooperation in this effort. MCPS has begun returning to some in-person learning. Our staff, especially our public health officer, Travis Gayles, and our director of the Office of Emergency Management, Earl Stoddard, have been working with the school administration to advise them on their preparations and activities. The school system has posted its reopening information at <https://www.montgomeryschoolsmd.org/reopening/>.

The other good news this week was that the FDA has approved a third vaccine produced by Johnson & Johnson. The County health department is receiving 1,600 doses of the Johnson & Johnson vaccine this week, in addition to the 4,500 weekly first doses of Moderna vaccines we receive (the County health department does not receive Pfizer vaccines—those go to some of the private providers). At our Wednesday press briefing, Dr. Gayles discussed the new vaccine. You can hear his thoughts at <https://youtu.be/kQwjMAhw0wQ?t=877>.

We are hopeful that in the coming weeks and months, the Federal government will send states more vaccines, and in turn, Maryland will distribute more to us. We are preparing to dramatically increase our capacity so that when the doses arrive, we will be ready. We will continue to get vaccines into arms as quickly as they arrive.

To help us move that process efficiently, please be sure to preregister with the County if you are in any of the [eligible groups](#). Everyone will get a vaccine, but it may take some time. We are as organized as is possible, given the generally chaotic distribution of the vaccines from the State and Federal governments. I am hopeful that our Federal and State partners are working on a better distribution system.

While our case rate of transmission continues to be high, it is much, much better than it has been. Essential to keeping that line in the graph headed down is maintaining physical distance, frequent hand washing and mask wearing—even if you have been vaccinated. Also, please refrain from travelling and large gatherings during spring break, Easter and Passover. It is tempting, I know, but we are making true progress. Let's not reverse it.

I continue to be grateful for your continued understanding and work to get us through this. We will get through this—together.
